

Coral Project-Based Learning.

Task: Create an informational document for your classmates about the diversity, importance and threats to coral. Your information can be in the form of a video, poster/infographic, or brochure.

Grading:

You will self-evaluate your project using the rubric below. Where it says "evidence", please write how you met the requirements under category (the better your argument, the more points!). Please make a copy to your Google Drive and submit to acomptonepa@gmail.com - All submissions are due by 11:59pm on Tuesday (1/22) (4th Period)/Wednesday (1/23) (7th Period)

Category	Possible Points	Evidence
Interesting facts -5 facts are presented -facts are interesting and informative	10	
Types of coral found in Florida -At least one type of coral is shown for each of the three types -Common or scientific names are given -Illustrations are included	15	
Diagram of reef shows general locations of branching, encrusting and boulder coral -Diagram is clearly labeled and correct	15	
Importance of Coral Reefs in Florida -Accurately depicts why Florida reefs are important -at least 2 reasons are given	15	
Coral Diseases -Coral diseases are listed and the disease is described.	15	
Other Threats to Coral Reefs -Threats to coral reefs have both an explanation of the cause and why they are bad for the reef.	15	
Overall layout/neatness of brochure	10	
On-time submission	5	5 Points will be deducted for late submissions AND a 0 for HW grade.
